

# Investors Mutual Private Portfolio Fund

*Investors Mutual launched the Private Portfolio Fund to mark 20 years since IML's establishment in 1998. Leveraging IML's strength in bottom-up, fundamental research to identify opportunities, the Fund's approach to investing is benchmark unaware and unconstrained - focussed only on achieving the portfolio's investment objectives.*

## Investment objectives

- **Positive net returns** of 3% above the RBA cash rate over rolling four-year periods
- **Low volatility** – the fund is targeting 50% lower volatility than the ASX 300

## Investment guidelines

- **No financial gearing** of the portfolio
- Focus on **Australian and New Zealand** listed securities
- **Prudent derivatives strategies** to protect the portfolio and generate returns
- Opportunistic **short-selling** of assets

## Who is the Private Portfolio suited to?

The Portfolio suits investors who are looking for the following characteristics over a four to five-year time horizon:

- consistent, **positive returns**
- with **lower volatility than**, and **low correlation to** the sharemarket in general

## Investment approach

The Portfolio will utilise three key strategies to generate returns throughout changing market conditions:

1. **Relative value:** investing in reasonably valued assets with attractive characteristics and at times short-selling overvalued and/or structurally challenged assets.
2. **Events:** targeting corporate event catalysts such as takeovers, M&A, buybacks, capital issues and restructures.
3. **Income:** utilising IML's research and stock-selection capabilities to target inefficiencies in the market and to derive income from prudent option strategies.
